Number AS91414 Version 2 Page 1 of 2

## **Achievement Standard**

**Subject Reference** Earth and Space Science 3.5

**Title** Demonstrate understanding of processes in the atmosphere

system

Level 3 Credits 4 Assessment External

Subfield Science

**Domain** Earth and Space Science

Status Registered Status date 04 December 2012

Planned review date 31 December 2019 Date version published 17 November 2016

This achievement standard involves demonstrating understanding of processes in the atmosphere system.

## **Achievement Criteria**

Achievement	Achievement with Merit	Achievement with Excellence
Demonstrate understanding of processes in the atmosphere system.	Demonstrate in-depth understanding of processes in the atmosphere system.	Demonstrate comprehensive understanding of processes in the atmosphere system.

## **Explanatory Notes**

This achievement standard is derived from *The New Zealand Curriculum*, Learning Media, Ministry of Education, 2007, Level 8, and is related to the material in the *Teaching and Learning Guide for Earth and Space Science*, Ministry of Education, 2010 at <a href="http://seniorsecondary.tki.org.nz">http://seniorsecondary.tki.org.nz</a>. The standard is aligned to the Earth systems and Interacting systems achievement objective of the Planet Earth and Beyond strand.

This standard is also derived from *Te Marautanga o Aotearoa*. For details of *Te Marautanga o Aotearoa* achievement objectives to which this standard relates, see the <u>Papa Whakaako</u> for the relevant learning area.

- 2 Demonstrate understanding involves:
  - explaining processes and links within the processes in the atmosphere system.

Demonstrate in-depth understanding involves:

explaining links between the processes in the atmosphere system.

Demonstrate comprehensive understanding involves:

- discussing the complexity of the atmosphere system.
- 3 Processes in the atmosphere system will be selected from:
  - atmosphere composition gases, aerosols including clouds, gradients, temperature, pressure, density
  - atmospheric circulation
    - convection cells Hadley, Ferrel, Polar
    - wind belts Trade, Westerlies, Polar Easterlies, Doldrums
    - Coriolis effect
  - transport of matter and heat energy water, gases, aerosols from volcanic eruptions
  - cycles water, carbon; biological pump and physical pump
  - climate global and regional trends temperature, precipitation, weather.
- 4 Assessment Specifications for this achievement standard can be found at <a href="http://www.nzqa.govt.nz/qualifications-standards/qualifications/ncea/subjects/">http://www.nzqa.govt.nz/qualifications-standards/qualifications/ncea/subjects/</a>.

## **Quality Assurance**

- 1 Providers and Industry Training Organisations must have been granted consent to assess by NZQA before they can register credits from assessment against achievement standards.
- Organisations with consent to assess and Industry Training Organisations assessing against achievement standards must engage with the moderation system that applies to those achievement standards.

Consent and Moderation Requirements (CMR) reference
